

Bibo

User Manual

Your Bibo Aroma Diffuser

Welcome to your new Bibo. Please read this manual before operating your Bibo and keep it for future reference.

Your Bibo Aroma Diffuser

The timer setting indicators are projected on the table surface.

Getting Started

1. Remove the bamboo fiber cover.

2. Fill the water tank to or below MAX water mark level.

⚠ Never fill water exceeding its maximum water mark level. Otherwise mist will not be generated properly.

⚠ Never add water around air vent.

3. Add 5-10 drops of natural essential oil into the water tank.

⚠ Be sure to use extract pure essential oils 100% from natural ingredients. To avoid damage to this device, NEVER use artificially produced synthetic perfume.

4. Cover the bamboo fiber cover

⚠ Please make sure the gap of cover is aligned with switches!

5. Plug the head of power adaptor into the power socket on the back of base and plug the power adaptor into the wall socket.

Mist and Timer Setting

Mist Setting

- 1st click mist on
- 2nd click mist off

Mist Mode Setting

To switch between 2 mist mode, please press switch for 2 seconds until indicator blinks:

Intermittent mist (30 sec. on / 30 sec. off) ↔ Continuous mist

Note: Timer is not interrupted whenever mist mode is changed.

Timer Setting

- 1st click 1 hour mist
- 2nd click 3 hour mist
- 3rd click 6 hour mist
- 4th click always on mist

Important Points You Must Know

- When water tank is empty, mist function will not be turned on.
- Water temperature, room temperature or humidity can affect the amount of mist resulting in shorter operating time.
- Due to water temperature or water quality, the amount of mist can be less at the beginning.
- Fragrance results may vary depending on ventilation, temperature, humidity, and the size of space
- NEVER empty the water from air vent side!

Maintenance

- The diffuser has an ultrasonic atomizer found in the water tank. Please clean the atomizer carefully using a cotton swab or a soft clean damp cloth at least once every week. You can clean the unit more often depends on your usage.
- NEVER apply aggressive force or shape object during cleaning process. Otherwise, the misting function can be damaged.
- Please make sure to unplug the adaptor from the power outlet when cleaning.
- Empty and clean the water tank when not in use. If necessary, please only use kitchen detergent when cleaning.

⚠ Safety Precautions

- When the product is not in use for any extended periods of time, turn the unit off and remove the power supply.
- Always place the unit on a firm, flat surface. It is also recommended that you choose a surface that is protected from the possibility of water spills. Never place the device on carpet or flooring that can be damaged from coming into contact with moisture and wetness.
- DO NOT touch the unit if it has fallen into water. REMOVE POWER immediately.
- DO NOT place or drop the unit into water or any other liquid.
- Use the device only as described in this manual.
- NEVER drop, clog, or insert any objects into the opening.
- DO NOT Place the unit near any heat or combustible materials.
- ALWAYS keep the cord away from high temperature.
- NEVER USE outdoors. Your unit is rated for indoor use only.
- NEVER COVER the unit while it is operating.
- STOP using the product if the power cord or any parts of the unit are damaged.
- DO NOT attempt to repair or replace any parts in the unit.
- Should you notice an unusual sound or smell discontinue use immediately.
- Keep this unit out of reach of children.
- When the product is at the end of its life, we recommend disposal at a collection point for the recycling of electrical and electronic equipment, rather than with household waste.

Troubleshooting

Problem	Possible cause	Solutions
The mist function is not working	Power supplier is not connected	Plug the adapter into the power socket and press the mist button
	Insufficient water	Refill the water tank
Mist function is not working effectively	Too much water	Dump the excess water until water level is below MAX line
	Ultrasonic atomizer is clogged	Clean the atomizer according to the instructions in this manual
The mist function is ON and the fan works, but no mist comes out	Some objects or water beneath the diffuser are blocking the air going into the vent underneath the diffuser	Remove the object(s) beneath the diffuser or clean the water underneath the diffuser
	Water drip has blocked the air vent	Clean the water in and around the air vent

Specifications

Model: M4
 Atomization mode: Ultrasonic
 Water tank capacity: 200ml (6.76 fl. oz.)
 Power input: DC 24V, 12W
 Mist Mode: Continuous/Intermittent
 Product Size: 135*135*110mm (5.3"x5.3"x4.3")
 Timer Mode: 1H / 3H / 6H / ON
 Working Time: up to 10 hours - continuous mode
 up to 20 hours - intermittent mode
 Accessories: Adaptor / Manual
 Made in China

Patented Product
